The screenshot shows the AWS VPC console interface. At the top, there's a navigation bar with the AWS logo, a search bar, and user information. The main header indicates the current path: 'VPC > Route tables'. Below this, the 'VPC dashboard' is visible, showing 'AWS Global View' and a 'Filter by VPC' dropdown. The primary content area is titled 'Route tables (5) info' and contains a search bar and a table of route tables. The table has the following columns: Name, Route table ID, Explicit subnet associations, Edge associations, Main, VPC, and Owner ID. The table lists five route tables, each associated with a specific VPC. The 'Main' column uses checkboxes to indicate the primary route table for each VPC. The 'VPC' column provides the VPC ID and name. The 'Owner ID' column shows the account ID for each VPC. On the left side of the console, there's a sidebar menu with options like 'Virtual private cloud', 'Your VPCs', 'Route tables', 'Internet gateways', 'Egress-only internet gateways', 'Carrier gateways', 'DHCP option sets', 'Elastic IPs', 'Managed prefix lists', and 'NAT gateways'.

Name	Route table ID	Explicit subnet associations	Edge associations	Main	VPC	Owner ID

The screenshot displays the AWS Management Console interface for VPC Route tables. The top navigation bar includes the AWS logo, account information (AWS, United States (N. Virginia)), and search functionality.
